PERMIT TO PLANT STREET TREES

Permission is hereby granted to: LACC
Robert Castaneda
BH Trees C
661-904-8126 Fax: _____

To plant tree(s) as specified by instructions below and where marked at curb by Urban Forestry Division Inspector.

PROJECT NAME: BHGI BH Trees C

PLANTING ADDRESS: 617 N Cumings St

PLANTING SITES:

Tree Position	Species to plant	Container size	Parkway Size
26	Various	15-gal	

SPECIAL INSTRUCTIONS:

Trees must be of size indicated and planted at designated distances apart and from curb as per attached City of Los Angeles specifications.

- Tree(s) must be inspected (tagged) prior to planting. Contact: _____
- Linear root control barriers shall be installed.
- Additional instructions:

YOU MUST CALL DIG ALERT AT (800) 227-2600 TWO DAYS PRIOR TO DIGGING.

Upon completion of tree plantings, contact the inspector for a final inspection.

BOARD OF PUBLIC WORKS
 URBAN FORESTRY DIVISION

Inspector: Elias Najjar
 Office Number: 213-847-3077
 Hours Available: 7:00 a.m. to 9:00 a.m.
2:00 p.m. to 3:00 p.m.

OFFICE USE ONLY

Inspector's Signature: _____ Final Inspection Date: _____

TREE PLANTING SPECIFICATIONS

The Bureau's goal is to preserve, protect, and renew the urban forest. Street Services encourages new plantings wherever possible and is ready to assist in all aspects of tree planting projects.

All trees permitted for planting in the public right-of-way require inspection prior to planting to confirm correct species, size, structure, and health.

The Bureau of Street Services requires that all new plantings adhere to the following specifications:

- Trees shall be a minimum 15-gallon size or as indicated on permit.
- Trees shall be installed with two ten-foot wood lodgepole tree stakes or its equivalent.
- Trees shall be secured to the stakes with two to four rubber tree ties in accordance with current arboricultural best management practices.
- The permittee shall agree to maintain the tree for a five-year establishment period and replace if necessary (Sub-division or B-Permit work where fees have been paid does not apply).
- The permittee shall keep the soil around the tree moist by watering the tree with 10-20 gallons of water every five days for the first eight weeks after the tree is planted. Thereafter, the tree should be watered every twenty days with a minimum twenty gallons of water. (Watering
- If required, Linear root control barriers shall be installed. The Bureau representative will assist you in the proper placement of the root control barriers.
- If required, Contact the Urban Forestry Division at the number indicated prior to purchase and planting for tree inspection and tagging or assistance in locating specified tree species.

Tree locations should be designed with great care when Traffic Control signs may be affected. The recommended desirable distances between street trees are species specific and ranges from twenty-five to forty feet. The following is a list of the minimal tree planting distances between various infrastructures:

6 feet	Water and Gas Meters
10 feet	Transit Shelters
8 feet	Driveway Aprons and Crosswalks
10 feet	Fire Hydrants
20 feet	Street Lights
20 feet	Electrical Power Poles
20 feet	Alley Entrances
45 feet	Intersections (45 feet from point of curb line intersect)
100 feet	Railroad Tracks

During the course of excavation for tree planting, it is understood that the marked location for tree planting may need to be moved/adjusted and sometimes omitted. If marked locations fall below the parameters of the minimal planting distances, contact the Inspector at the number indicated or Urban Forestry Division at (213) 847-3077. The Bureau looks forward to assisting and serving the communities' tree planting needs.
